

Punctateon eloiseae Abbott, R.T., 1973

Best of the best! Live collected! Super! F++/Gem 28.4 mm
Masirah Isl. Oman. This is the best eloiseae I've ever seen. Stunning pattern and color combined with exceptional quality makes this shell one of the most beautiful in the world. Damn it, I give you a guarantee that when this shell is in your hands, you will forever forget how much you paid for it. This legendary shell is a symbol of Masirah Isl. For many collectors this species the most beautiful and unusual among all seashells. Long time, this species was considered extinct.
