

Neptunea despecta

Very large and well preserved set of two colors
The brown specimen with very thick flaring lip, the white with
small flaw at muffle outer lip at base. Fantastic quality for a
difficult species

Trawled by Belgian fishermen off Iceland.

132,5+ 129 mm w/op F+++

December 1991

off Germen Bight, North Sea

95,5 mm F++++

No auction at 100 \$, Dec 2016
