

## **CYPRAEACASSIS RUFA - BEAUTIFUL NATURAL CANAL MADAGASCAR ±152 mm F+++/GEM -**

Quality: F+++/GEM I see no important flaws. Tiny chip on the canal.

Collected: Collected by local diver at around 15 to 25 meters on sand off Diego Suarez, Madagascar.  
(NATURAL CANAL)

Comments: Only few shells I see have a natural canal. This is one of them. 95% of all rufa have a humanly altered and enhanced canal
