

**Charonia tritonis 123.55mm. Tiny Hawaii Triton's Trumpet Shell-Hawaiian Seashell**

**an excellent Hawaiian Triton's Trumpet Shell-Charonia tritonis.**

**This excellent, tiny shell measures approximately 123.55mm. by digital caliper and is in F++ condition with a normal lightly clipped protoconch , a fine lip and outstanding. lightly faded color with excellent markings and unique sculpting and design.It is much smaller than average size for the species and super hard to find at this size. It was found, crabbed, on the North Shore of Oahu in 105 feet of water in rubble. This is an outstanding specimen of a very hard to find tiny shell for the species.**
