

***Pustularia cicercula takahashii* Moretzsohn, 2007**

Cypraea Pustularia Tuamotensis Takahashii (Moretzsohn, 2007).

Location: W Shore, Maui, HI. Grade: Gem. Size: 15.1mm. Notes: This Cypraea Pustularia Tuamotensis Takahashii was self collected on Scuba on a night dive in perhaps 10ft or less where the sand meets the reef line way back inverted under a dead coral outcrop mixed in the same area I found the Mauiensis in. This Takahashii was just cleaned out yesterday to give it that fresh out of the ocean look.
