

**CORONATA DEBRUINI - SUPER SOUTH AFRICA**  
**33.7 mm F+++/GEM - A1074**

Quality: F+++/GEM I see no important flaws. Typical fine lines.

Collected: Hout Bay area at 35 to 38 meters, South Africa.

Comments: Super size specimen and great pattern. High quality specimen. As a dealer we're very lucky that we know people who keep some of the top specimens from South Africa for us, at an affordable price.
