

## CYPRAEA FRIENDII- VERY NICE MANDURAH

80.1 mm F+++/GEM -

Quality: F+++/GEM I see a small flake missing only on the inside of the posterior canal. Outside is perfect. A very minor flaw.

Collected: Collected by diver at 7 to 11 meters, on orange sponge, James Service Reef, Mandurah, WA, Australia, 2016.

Comments: Beautiful reddish/orange pattern with a nice dorsal line. Dark orange base. A very nice specimen.
