

**GUTTATA GUTTATA BICALLOSA - SUPERB TOP
QUALITY 62.9 mm GEM - A1019**

Quality: GEM I see no flaws. One sand grain under color and gloss is no flaw to us.

Collected: Tangle net at 100 meters off Balicasag Island, Philippines, 2008.

Comments: Absolutely superb specimen of the bicallosa form with very thick white callous sides. Great size specimen of top quality. Great color and pattern.
