

CYPRAEA HUNGERFORDI LOVETHA - THE REAL THING ALIGUAY ISLAND 25.4 mm GEM - Q1114

Quality: GEM I see no flaws.

Collected: Trawled by local fishermen at 100 to 150 meters off Aliguay Island, Mindanao, Philippines, December 2005.

Comments: Almost all specimens sold as lovetha are just normal Chinese hungerfordi. Lovetha is rare and has to be long and very slender and has a pale base, not orange. Only found around Aliguay Island. **THIS IS THE REAL THING !**
