

***Nesiocypraea teramachii polyphemus*, Lorenz, 2002**

**Outstanding! Live collected! Ultra rare. 56.1 mm. F+/F++  
(few growth lines)**

**Balut Island. Philippines. Ultra rare. I have not heard of new specimens in the last 5 years. This is a very large and glossy specimen, very beautiful shape.**

**I guarantee that this specimen was caught alive.**
