

**Mitra fulvescens-30.33mm.Hawaii White Mouth Miter Shell-Hawaiian Specimen Shell**

**an excellent Hawaiian White Mouth Miter Shell--Mitre (Nebularia) fulvescens--Broderip, 1836.**

**This excellent miter shell measures approximately 30.33mm. by digital caliper and is in F++ condition with a nice, lightly tipped protoconch, an excellent, adult lip and great color and pattern. This specimen is larger than average size for the species. It was found on the South Shore of Oahu in 3 feet of water in rubble.**
