

Aspella Producta WO (Pease, 1861). Location: S Shore, Oahu, HI Grade: F+++ . Size: 17.0mm. Notes: This Aspella Producta was self collected on a day dive in 100ft under a med sized rock on its base, just found and cleaned out with the OPERC, nice rich yellow color that only just live one's have. Shell is of normal quality for this type of shell
