

Nassarius papillosus-39.92mm. Dark Hawaii

an excellent Hawaiian Pimpled Basket Shell-Nassarius papillosus--Linnaeus, 1758.

This excellent shell measures approximately 39.92mm. by digital caliper and is in F+++ condition with an excellent protoconch, a fine, fragile, juvenile lip and great color with beautiful sculpting. It is larger than average size for the species and a very dark color compared to most. A very clean and attractive shell. This excellent specimen was found on the North Shore of Oahu at 85 feet in sand under rubble .
