

Nerita Linnerita Polita WO (Linnaeus, 1758). Location: N Shore, Oahu, HI. Grade: Gem. Size: 24.0x17.6mm. Notes: This Nerita Linnerita Polita was self collected on as I was walking into the water for my dive crawling on the side of an exposed rock surrounded by sand and rubble. It has a RICH yellow mouth color when you just find them, perfect thick lip, very nice pattern, I personally could not see anything wrong with the specimen
