

## GLORIPALLIUM PALLIUM - AWESOME RED SUNRAY THAILAND 57.5 mm

Quality: GEM I see no flaws.

Collected: Trawled by Thai fishermen in deeper water S.E. of Koh Racha Yai Island, Thailand, early years 2000.

Comments: What a pleasant surprise when I cleaned a dirty shell into this superb sunray specimen. I had a hard time finding this super quality in old stocks. Only very few are found today and most have drill holes.
