

GLORIPALLIUM PALLIUM - YELLOW-ORANGE-DARK SET THAILAND 65/73 mm

Quality: GEM I see no flaws.

Collected: Trawled by Thai fishermen in deeper water S.E. of Koh Racha Yai Island, Thailand, early years 2000.

Comments: Superb set including a more yellow, orange and dark classic specimen. Bigger size shells. I had a hard time finding this super quality in old stocks. Only very few are found today and most have drill holes.
