

Astraliium tentorium

Origin: S.W. Aust.

Author: Thiele 1930

Size: 44m, 49.6mm.

Grade: F2

"Tent Top Shell" A very difficult species to obtain. Displaying sculptured whorls & a lovely yellowish / cream tone. Unique coloured operculum & columellar. The extra large one has an anomaly around the edge of the last whorl. Typical pearling on the early whorls. Last of them.
