

*Phaenomenella insulapratasensis* (Okutani & Lan, 1994) - DEEP WATER SHELL, RARELY SEEN WITH OPERCULUM! This species of RARE deep water snail only occasionally appears with accidental trawling by-catch. LOVELY MATURE LIP, beautiful shell sculpture and design! Truly something special, even with minor acid defects at the spire.

Size: 40mm            Quality: F+++

Collecting Data: Taiwan, 2017.
