

**Phalium muangmani -GREAT QUALITY SET OF 2
THAILAND 51 & 58 mm F+++/GEM-**

Quality: F+++/GEM I see no important flaws. Tiny piece of the spire of the bigger specimen missing, spire of the smaller specimen intact. Both canals have been enhanced a little bit.

Collected: At 5 to 10 meters, off Rawai, Phuket Island, Thailand, January 2016.

Comments: Set of 2 nice specimens.
