

Family: Conidae
Genus: Conus
Species: gloriamaris
Origin: Sth. Thailand.
Author: Chemnitz 1777
Size: 112 mm
Grade: F3 (F+++)

"Glory of the Sea" Once extremely rare and the most revered in the genus. This one is a good size and has the attributes of an intact outer lip and siphonal notch. Posterior of the base there is a small lump anomaly but I think hardly offensive. The outer lip is original and has not been perfected by the fishermen.
