

Conus grangeri maculospira

Very nice quality, hard to get now.

Remarks: In ***C. grangeri granger*** from very deep water, the flat ribbons cover the entire body whorl. ***C. g. maculospira*** differs from *C. inscriptus* in protoconch and the sigmoid rather than concave outline of the spire

Trawled at 25 m depth
Ranong, Thailand 2002
58,2 mm GEM
