

**TEXTILIA SOLANGAEAE - SUPER LAVANONO 22.7  
mm F+++/GEM - B3961**

Quality: F+++/GEM I see no important flaws.

Collected: Lavanono, Madagascar.

Comments: Very selected out of many specimens. Most of these shells are dead. They wash up on the beach in big surf. Because of the dangerous waters it is almost the only way to get them. Sometimes the lip is enhanced and it is hard to see.
