

Conus crocatus thailandis, (da Motta, 1978)

66,15 mm; F+++

GIANT SIZE & BEST QUALITY! Hard to get with this size and quality like this. Beautiful dark brown color with clear white color pattern. Natural lip with operculum. Very minor defects which really do not harm the beauty of this shell. Totally one of the BEST that I have ever got.

Collected by local in sandy bottom 40 meters deep, off Racha Island, Phuket Island, Thailand (2018)
