

Mauritia arabica asiatica f. *empressae* (Schilder & Schilder, 1939) -
DARK, FRESH, HUMONGOUS AND MATURE! The BEST in
terms of COLOUR AND SIZE, A WHOOPING 70MM RARELY
SEEN FOR THIS SPECIES! CRIMSON-ORANGE BASAL
COLOURATION contrasting to the usual dull beige, super fresh from
the sea with STUNNINGLY DARK MARGINS AND DORSAL
PATTERNS! It pains me to have to let this specimen go. RARELY IN
THIS SIZE AND COLOUR. A minor growth line on the dorsum, but
this specimen is truly a ONCE IN A LONG TIME OCCURENCE!

Size: 70mm Quality: F+++

Collecting Data: Malaysia, 2017.
