

## **AURANTIUM - PHILIPPINES 98.3 mm F+++ - A1201**

Quality: F+++ Because of the typical growth lines and some fine scratching on the dorsum.

Collected: By tangle nets at 80 meters, off Bucas Grande Island, Philippines, 2010.

Comments: Despite the flaws still a very reasonable specimen, especially because it's hard to get a top quality aurantium. Nice color and banded.
