

CYPRAEA CERNICA LEFORTI, 28.1mm. Senders & Martin, 1987.

One out of thousands shells self collected during my over 40 years of shell diving world wide.

Big, fully mature, heavy shell with nice callus.

There are a few tiny hardly visible air blisters otherwise is Gem.

Collected at depth 35 meters in cave during night diving, 2004

88 \$, May 2019
