

Cypraea eludens, Beautiful Dark Pattern, Large, 68.3mm, Australia Shell

This is a *Cypraea eludens* that is 68.3mm in F++ condition (has an algae spot on the top of the dorsum and some green under the nacre near the anterior end).

- Beautiful dark pattern with a nice blue halo on the specimen.
- Large, very heavy, and high shell.
- A striking specimen in spite of the flaws.

Found in Western Australia. Collection data provided with the shell. White spots on the shell are from the camera.
