

**CYPRAEA GANGRANOSA & REENTSI - RED  
INTERMEDIATE 16.2 mm**

Quality: F+++/GEM I see no important flaws, only very minor and hard to notice.

Collected: Collected by Gypsy diver at around 40 meters on rubble off Koh Racha Yai Island, near Phuket Island, Thailand, Dec 2017/Jan 2018.

Comments: Beautiful flawless intermediate form specimen in the hard to get red color.
