

**ASIATICA GIBBA - VERY FAT KOH LOHN ISLAND
55.1 mm F+++/GEM - A0138**

Quality: F+++/GEM I see no flaws except for a tiny color inclusion on the margin and a hard to see fine short line in the middle of the dorsum. Near GEM.

Collected: By gypsy diver at 1 to 2 meter at Koh Lohn Island, Thailand.

Comments: Super fat specimen with callous margins with nice spots.
