

Granulata (Pease, 1862). Location: N Shore, Oahu, Hawaii.
Grade: GEM. Size: 28.6&25.1mm. Notes: These Cypraea
Granulata's were self collected on Scuba in 30ft under a large
table on its back ceiling in a crack, almost missed this pair as
they were righth next to each other. These both were just
found and have dark rich color, extra pustulated, straight
mantel lines
