

Cypraea marginata ketyana bataviensis

F++ 53.3mm; A stunning piece!!!.

Absolutely beautiful colour, pattern and shape.

Unfortunately the shell has a hairline crack running back from anterior dorsal ramp, along the labral margin.

Despite this, the shell as you can clearly see remains an exceedingly beautiful piece.

Collected by diver - Off Kalbarri - Western Australia.

219 €, Sep 2018
