

Maculifera Hawaiiensis (Schilder & Schilder, 1937). Location: N Shore, Oahu, HI. Grade: Gem 63.8mm. Notes: This Cypraea Maculifera Hawaiiensis was self collected on Scuba on a night dive in 25ft just under a large table midway on its ceiling. This Mac is DARK EXTRA EXTRA high margins with slight stretch marks showing how really mature it is, hard to get STRAIGHT MANTEL line, DARK blue base, I personally did not see anything wrong with this beauty and gave it a RARE Gem
