

*Mauritia maculifera* Hawaiiensis

N Shore, Oahu, HI. F+++/Gem, 75.0mm.

Notes: This *Cypraea Maculifera* Hawaiiensis was self collected on Scuba on a night dive in 40ft in a huge open cave on its undercut about 10ft back on its ceiling. This Mac has an AMAZING combination of blue beige base color with a gorgeous blotch, side marginal pattern is VIVID, as is the DARK clear top pattern, this one has it all, issues are 2 micro pings on the main margin and a line on the base but way under the nacre
