

*Mauritia maculifera hawaiiensis* (Schilder & Schilder, 1937).

Location: N Shore, Oahu, HI.

Gem Minus ; 78.2mm.

Notes: This *Cypraea* (*Mauritia*) *Maculifera Hawaiiensis* was self collected on Scuba on a night dive in 25ft back in a cave on its ceiling sitting on sponge feeding. This is the best example of a rounded Female Mac I have seen this year PERIOD, top looks swollen like it will pop, larger than normal top pattern, perfect BLUE base, killer marginal pattern, this one was made to reproduce
