

*Zoila marginata consueta* Biraghi, 1993 F++, 66.9 mm, SW Australia, now available. This piece comes in overall fair condition, of considerable size and pleasant markings. The downgrading is largely due to the overglazed chip at the anterior margin and some growth marks on the dorsum. Please see photos for more information. It exhibits pleasant tan to caramel markings on the dorsum, dark chocolate maculae on the base, and the canals are intact
