

CYPRAEA MAURITIANA - HARD TO GET MARQUESAS ISLANDS 60.2 mm F+++/GEM -

Quality: F+++/GEM I see no important flaws. Very minor growth imperfections and inclusions.

Collected: Collected by local diver at 10 to 15 meters off Taiohae, Nuku Hiva, Marquesas Islands, 2004. (Ex Coll J&J Demartini)

Comments: More difficult to get from this locality. Very hard to get this outstanding condition in mauritiana.
