

**CYPRAEA MAURITIANA - SUPER QUALITY KOH
RACHA YAI 72.8 mm**

Quality: F+++/GEM Very minor flaws. A typical fine growth line and a tiny inclusion on the edge of the margin.

Collected: Collected by Gypsy diver at night at 2 to 4 meters on rocks at Koh Racha Yai Island, near Phuket Island, Thailand, January 2018.

Comments: Not a rare shell, but super hard to find a good quality one, like this specimen is.
