

**Cypraea mus donmoorei, Petuch, E.J., 1979**

Strange shell with an unusual striped base! 61.5 mm. F+++  
Venezuela. Big sized. Fantastic clear pattern. This is very unusual  
specimen - the base and margina are covered with unusual  
stripes, these are not cracks. Extra wide, almost globular one.  
Hard to get C.mus donmoorei a similar size and condition.
