

Cypraea Sulcidentata (J.E. Gray, 1824). Location: N Shore, Oahu, HI.
Grade F+++/Gem both Size 39.3 47.5mm Notes: These *Cypraea Sulcidentata* were self collected on night dive in 30ft way back under a large table in a crack on its ceiling nestled together, a true mated pair. Both have that KILLER PURPLE hued MARGINS, both are in EXCEPTIONAL condition, just found and cleaned out and you can see in the 3rd picture the nice yellow teeth showing they were just cleaned out giving them that FRESH OUT OF THE OCEAN look
