

## Cypraea Sulcidentata

N Shore, Oahu, HI, F+++/Gem, 43.5mm.

Notes: This Cypraea Sulcidentata was self collected on night dive in 25ft in a cave(same as the smaller one :) about 15ft back on its ceiling feeding on sponge. This Sulcidentata is just FAT, HEAVY, MATURE, HIGH calloused margins, clear banded pattern on top, just a excellent to have in your collection, it has micro dimples on the base area and 1 micro white pimpl
