

*Cypraea Sulcidentata* (J.E. Gray, 1824).

Location: N Shore, Oahu, HI

Grade: F+++ Size: 48.1mm.

Notes: This *Cypraea Sulcidentata* was self collected on night dive in 25ft under a large table on its back wall in a crack, took me about 3 mins to work it out of its tight spot. This *Sulcidentata* is just FAT FAT, HIGH calloused margins, it does have numerous dimples on the base area, some lineage and issues on the top area
