

Cypraea tessellata, Dark Spots, 30.1mm, Hawaii Shell

This is a *Cypraea tessellata* that is 30.1mm.

- Nice dark spots on the specimen.
- The shell was **found dead** and there is wearing on the dorsum but the base has natural gloss. The dorsum has been lightly buffed. Shows very well as a representative specimen.

Found on the island of Oahu, Hawaii. Endemic Hawaiian shell. Collection data provided with the shell. White spots on the shell are from the camera. Shipping costs can be combined on multiple wins.
