

tigris f. olgiatiana Bozzetti

Uncommon .Like a slender pardalis, ivory white usually with a poorly developed spotting, more similar to a pantherina albonitens than to a tigris.

Madagascar, 90's
old collection.
62,5 mm F+++ / GEM

Remarks: The real thing is not the broad cream or lemon yellow that are recently offered under this name and also figured in Gastropods. In Gastropods you can see the real form as intended by Bozzetti.
