

*Cypraea Tigris Schilderiana* (Cate, 1961).

N. Shore Oahu, HI.

F+++/almost ; 126.2mm.

Notes: This JUST A HAIR UNDER 5 inches *Cypraea Tiger* was self collected on a day dive in 40ft on top of a coral structure in the open. It is VERY FAT, THICK, well proportioned, MASSIVE sized Tiger, nice UNIQUE top pattern throughout. Just a well rounded Tiger for its size, issues are some light scratches around the posterior area, very light issues hard to see on the rest of the Tiger.
