

CYPRAEA URSELLUS JOMI - HARD TO GET KOH HEE ISLAND, THAILAND 15.4 mm

Quality: GEM I see no flaws.

Collected: Collected by Gypsy diver a night at over 30 meters on rubble off Koh Hee Island, Thailand, 14 December 2017.

Comments: Ursellus might be easy to find in the Philippines, but in Thailand the Gypsy divers have a hard time finding only a few in 1 or 2 months. I have only 2 specimens.
