

LEPORICYPRAEA VALENTIA, (*Perry, 1811*)

80,76 mm; GEM

By Tangle net at about 120-150 meters deep, Davao Island,
Philippines (2018)

DARK & BEST QUALITY! Nice dark brown blotch with well
spread dots on both marginal side. Fully matured specimen
with callous teeth. Perfect anterior & posterior canal. I don't
see any flaw on this shells.
