

**CYPRAEA VENUSTA EPISEMA SORRENTENSIS -  
BEAUTIFUL CARNAC 55.1 mm F+++/GEM**

Quality: F+++/GEM I see no important flaws. Some white spots on the body margin and dorsum.

Collected: Collected by diver at 8 to 15 meters on sponge at limestone reef near Carnac Island, WA, Australia, 2013.

Comments: Beautiful margins and great dark dorsum.
