

## Superb fossil, *Lyria harpularia*

An exquisite and beautifully preserved specimen of the Middle Miocene (~14.5 million years) Australian volute *Lyria harpularia* Tate, 1889 21.6 mm , Victoria, Australia, now available. This is in absolutely outstanding condition for its age, and is a fossil very rarely offered at auction. This piece is in superb condition, with sculpture as sharp and prominent as if it was collected yesterday.
