

Haliotis corrugata

Common name: Pink Abalone or Corrugated Abalone

Condition: F++

Locality: Baja California, Mexico

SIZE: 99mm

Colors: red/ brown and blue/white

Notes:

These *Haliotis corrugata* are in excellent condition (Grade F++) .These shells are hard to find in this good of condition in this brick red color. There is no major damage like you typically see on this species just a little rock rub near the apex. Lip is very good\, colors are deep brick red with a little green band near the apex. Has no growth on it. It's from Baja Ca Mexico commercially collected.) Muratic acid was not used in it's cleaning .
