

*kamtschatkana assimilis*

*Threaded Abalone lot*

*36 pcs lot*

*This is the nicest set of shells I have ever listed . All rare colors and patterns are represented in this lot. For the record I don't condone the taking of any animal before it has reached maturity. These shells were found mixed in with a large collection of Haliotis shells that I purchased in Mexico long ago.*

*Author: Dall 1878*

*Common name: Threaded Abalone*

*Condition: F++*

*Locality: Baja California, Mexico (From an Old collection)*

*SIZES: about 59mm to 90mm*
